Ahmad Alshakhshir

Computer Science Graduate | Flutter & Full-Stack Developer

Zarqa, Jordan | alshaksherahmad857@gmail.com

LinkedIn | GitHub | Portfolio

SUMMARY

I build Flutter apps and websites for real clients in Jordan, from accessibility platforms to online stores. I write clean, maintainable code that is ready to grow with your business.

Computer Science graduate from Applied Science Private University, Good standing. Open to full-time and freelance roles.

EXPERIENCE

Flutter Development Trainee

Jul 2026 - Sep 2026

Field Training, Kayan HR

- REST API integration with Dio
- Clean Architecture
- Offline and local storage strategies
- Firebase services
- Performance profiling

PROJECTS

MOBILE APPS

Able+: Accessibility Services Platform

Graduation project

A Flutter app that helps people in Jordan find accessible services, charities, tutors and community support.

Flutter, Supabase | GitHub

GoTrip

A travel deals app to browse destinations, sign up and log in. I designed the screens and navigation.

Travel, UX Design

News App

Live headlines from a REST API, with articles cached for offline reading.

Flutter, REST API, Caching | GitHub

WEBSITES

Rafaq Tec

A bilingual website for my software studio, with an AI chat assistant and a working contact form.

Cloudflare Workers, D1, SEO | rafaqtech.com

ElderlyMed Store

An online store for a medical devices shop in Jordan, with orders, search and an admin panel.

MySQL, Linux VPS | elderlymedjo.com

Travel Company Website

Service and destination pages with a database behind them and a smoother user experience.

Full-Stack, UX

Al-Rashid Renewable Energy

A bilingual marketing website for a renewable energy company, on its own custom domain.

HTML & CSS, Deployment | GitHub

Admin Dashboard
A web dashboard to manage users and requests, with a companion Flutter app.
Flutter, Dashboard, Clean Architecture | GitHub
